SU-587123 236 LZ-CZ] KIEN= 22.07.76 *SU-587-123 Mixt. for the mfr. of bricks - contg. dehydrated clay, hydrated once after forming, the strength increasing after 28 days EXAMPLE A typical mixt. contg. (in wt. %): (I) 5. (II) 80 and (III) 15. The bricks withstand water at the solid: water ratio of 3:0.5, and steaming or gave bricks with compressive strength of 102 kg/cm² at %): dehydrated clay (I) 5-40, hydrated nepheline sludge (II) 30-80 and nepheline sludge of specified coarseness Semi-dry pressing under 150-400 kg/cm2 of building bricks contains (in wt mod. 1.5-2.5) (III) the rest. The clay (I) is obtd. by heating to 500-800°C and (II) is obtd. by grinding with yfelds bricks which require no further firing or autonepheline sludge and granulated nepheline sludge (05.01.78) CO4b-15/08 In air (water) to 205(208) kg/cm2. 35 freezing cycles. (2pp124) 8 Mixture for the mfr. 22.07.76-5U-389734 KIEV ENG CONS INS autoclaving. **853312/47** claving.
